DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Sharpe et al. (U.S. Patent No. 5,433,722).

Sharpe et al. discloses a surgical needle holder (10) comprising an electrically-insulated housing and an insulated electrically-conducting support body within the housing. The needle holder is formed of polysulfone plastic mold that is considered to be the insulation, and the support body is made of stainless steel that is considered to be electrically conducting. (Col. 2 line 67- Col. 3 line3) Also disclosed is an actuating mechanism (27) including an operating knob (15) on the housing moveable from a first (withdrawn) position to a second (operating) position with an automatic release causing the needle (11) to be withdrawn into the housing when the operator releases the knob.

Allowable Subject Matter

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 for art cited of interest.
